

## **RUNIA – The smart legal assistant**

Powered by Louna, RUNIA is revolutionizing the practice of law in Tunisia and beyond. The first intelligent assistant designed specifically for professionals in the legal sector, it combines technological performance with an in-depth understanding of the real needs of lawyers and magistrates.

# An innovation designed by and for legal professionals

## Intelligence at the service of justice

RUNIA is not just a piece of software: it is a true intelligent assistant that understands legal language, anticipates your needs and adapts to your daily workflow. Developed with real-world legal expertise, it transcends the limitations of traditional tools to deliver a truly transformative experience.

In a world where the volume of legal information is constantly growing and deadlines are getting shorter, RUNIA is becoming the indispensable ally that allows legal professionals to focus on what really matters: strategic advice and defending the interests of their clients.

# Our vision: To make the daily life of legal professionals easier

## Considerable time savings

Automation of repetitive and time-consuming tasks that allow you to recover up to 40% of your working time to focus on higher value-added missions.

## Intelligent Automation

Automatic document processing, extraction of key information, and generation of structured summaries without human intervention, while maintaining impeccable legal accuracy.

## Instant 24/7 support

Constant availability to answer your questions, assist you in your research or help you prepare your files, whenever or wherever you work.

RUNIA's artificial intelligence has been specifically trained on legal corpora in French and Arabic, ensuring an accurate understanding of Tunisian and international legal vocabulary. Our technology is constantly evolving thanks to the feedback of our users, ensuring a continuous improvement of its performance and relevance in your daily practice.

# Key features: A complete ecosystem at the service of the law

## **Automatic summary of legal cases**

RUNIA analyzes your large files and generates structured summaries in seconds, automatically identifying essential facts, main arguments, and crucial legal points. No more hours spent going through hundreds of pages.

## **Intelligent planning management**

Ask RUNIA in natural language: "What are my files next week in Sousse?" or "Remind me of my hearings for the month of June". The assistant manages your calendar, alerts you to important deadlines and optimizes your daily organization.

## **Fast and relevant legal research**

Instantly access case law, legal texts, and relevant doctrinal references. RUNIA understands the context of your research and offers you the results best suited to your specific problem.

## **Writing and proofreading of documents**

Generate draft contracts, conclusions, requests or letters in a few clicks. RUNIA also offers intelligent proofreading that detects legal inconsistencies, errors of form and suggests stylistic improvements.

# Unprecedented multilingual expertise

**70+**

## Supported languages

From Arabic to French, from English to European languages

**300**

## Dialects included

Including regional Arabic and Tunisian dialects

## Communication without language barriers

In an increasingly globalized legal world, RUNIA breaks down language barriers. Whether you are working on international cases, need to translate complex legal documents, or want to communicate with clients who speak different languages, RUNIA understands and translates with remarkable accuracy.

Our natural language processing technology has been optimized for the legal context, ensuring that terminological nuances and legal specificities are preserved in each language. This multilingual capacity makes RUNIA a tool particularly suited to the bilingual Tunisian context and international collaborations.

# Real-world use cases: RUNIA in action

## Expedited Hearing Preparation

Ms. Salma is preparing a complex argument. In a few minutes, RUNIA provides him with a complete summary of the 450-page file, identifies relevant case law precedents and generates a structured plan of argument. What used to take a whole day now requires only 30 minutes.

## Optimized maturity management

Mr Karim runs a firm with several partners. Every morning, RUNIA automatically reminds him of all the day's deadlines, scheduled hearings in different courts, and documents to prepare. Plus, there's no risk of forgetting a crucial deadline.

## Instant legal research

In the middle of negotiations, Me Leila needs to quickly verify a point of law. She questions RUNIA who instantly provides her with the relevant articles, recent case law and even doctrinal commentaries, allowing her to answer her interlocutor with confidence.

These examples illustrate how RUNIA fits naturally into the daily lives of legal professionals, whether they work in law firms, companies or judicial institutions. The impact is measured not only in terms of time saved, but also in terms of improving the quality of legal work and reducing the stress of administrative tasks.

# Collaborative development with professionals in the field

## Co-created with Mme Héra Chérif

RUNIA is not the result of a purely technological vision disconnected from the realities on the ground. It was co-developed with Mrs. Héra Chérif, lawyer at the Court of Cassation, who brought her in-depth legal expertise and intimate knowledge of the real needs of legal professionals.

This unique collaboration between legal expertise and technological innovation ensures that each feature of RUNIA meets a concrete need and fits naturally into the workflows of law firms and judicial institutions.

## Active promotion of digitalization

Ms. Héra Chérif has organized several seminars bringing together hundreds of lawyers to present RUNIA and actively promote the digital transformation of the legal sector in Tunisia. These meetings provided valuable feedback that continues to guide the evolution of the platform.

# Tangible benefits for your professional practice

## **Drastic reduction in administrative burden**

Free yourself from repetitive tasks: automatic filing of documents, extraction of key data, generation of custom models. RUNIA handles the administrative while you focus on the legal.

## **Instant access to legal information**

No more hours of searching through complex databases. RUNIA understands your questions in natural language and immediately provides you with relevant, sourced and contextualized information.

## **Significant improvement in productivity**

Handle more cases, respond faster to your customers, and improve the quality of your services with an assistant that never sleeps or makes careless mistakes.

## **Easier team collaboration**

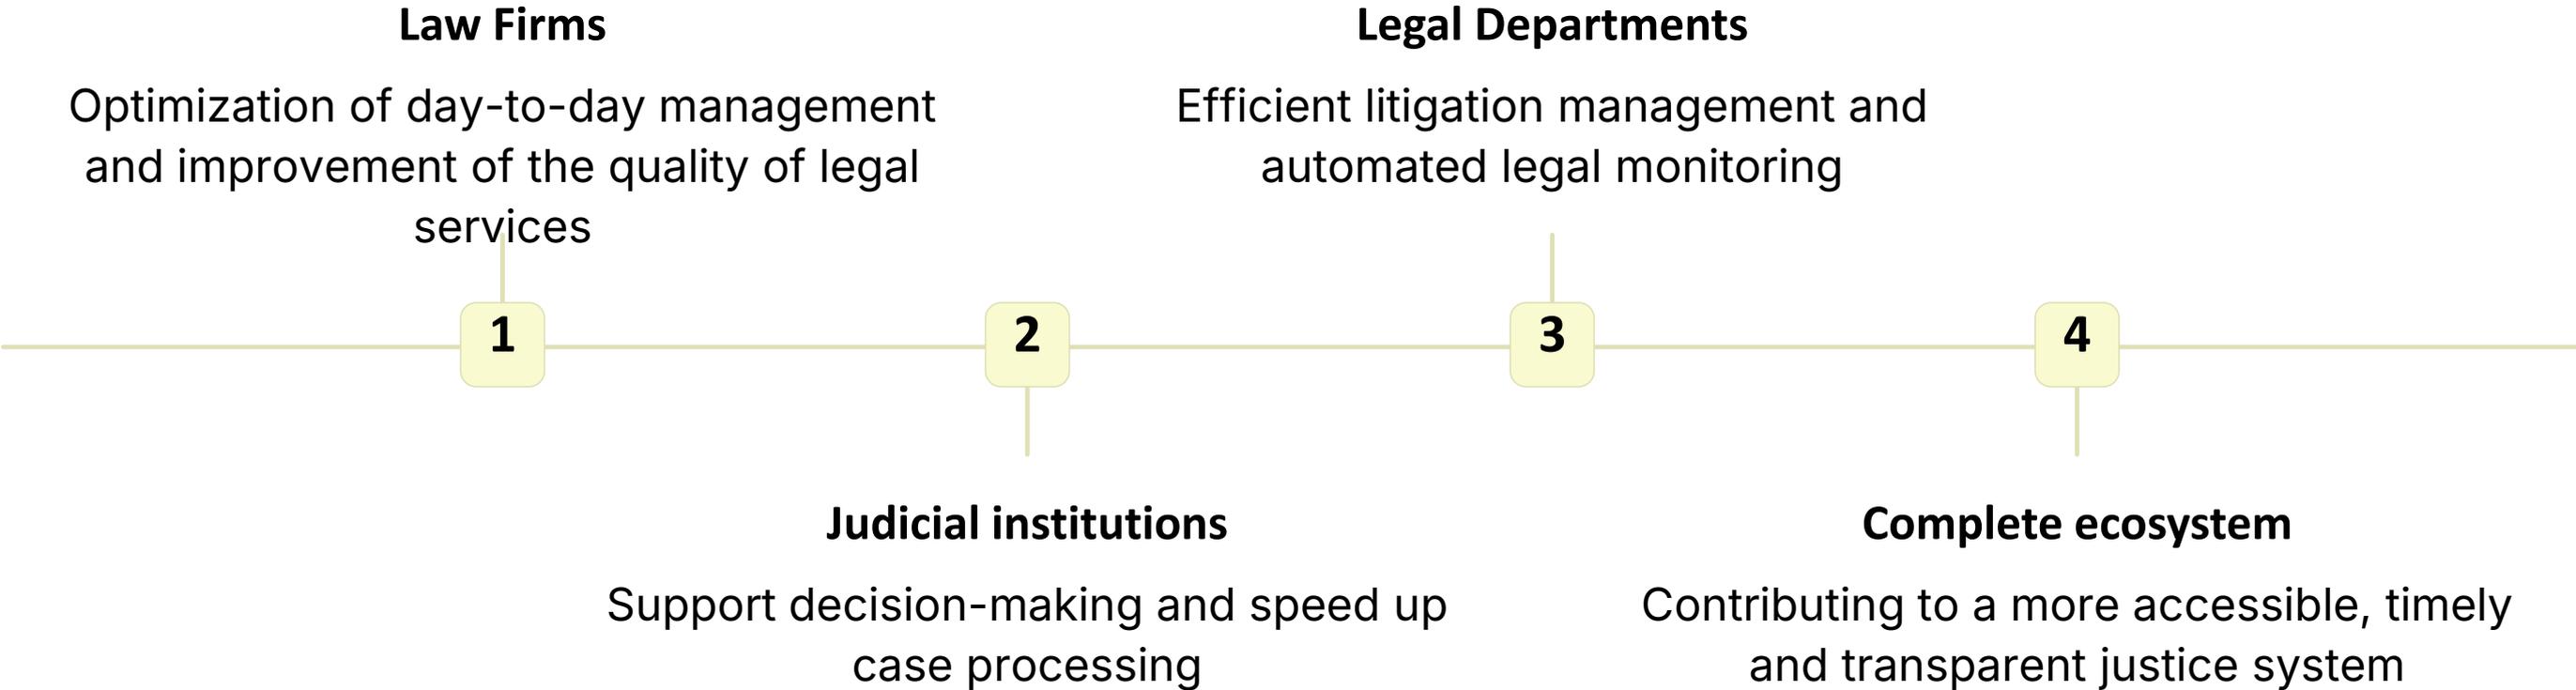

Instantly share notes, research, and analysis with your collaborators. RUNIA centralizes information and ensures consistent teamwork, even remotely.

**Measurable impact de:** Our users report an average of 40% reduction in time spent on administrative tasks and a 35% increase in their ability to process cases simultaneously.

# Integration into the Tunisian judicial ecosystem

## Support for the digital transformation of justice

RUNIA is fully in line with the dynamics of modernization of the Tunisian judicial system. By facilitating access to legal information, speeding up the processing of cases and improving collaboration between the various legal actors, our solution actively contributes to the efficiency and transparency of justice.

Beyond Tunisia, RUNIA adapts to the legal specificities of different countries and legal systems. Our ambition is to become the reference for intelligent legal assistance throughout the French- and Arabic-speaking world, while respecting the local particularities of each jurisdiction.

# RUNIA: Your smart legal ally

## More than a tool, a revolution

RUNIA is not just another piece of software in your technological arsenal. It's a true smart ally, available 24/7, who understands your needs, anticipates your questions, and adapts to the way you work.

Reliable, multilingual, and designed by and for legal professionals, RUNIA represents the future of legal practice: a harmonious alliance between irreplaceable human expertise and the power of artificial intelligence in the service of justice.
